Abstract

In [S. Khan and G. Yasmin, Lie-theoretic generating relations of two-variable Laguerre polynomials, Rep. Math. Phys. 51(1) (2003), 1-7], S. Khan and G. Yasmin constructed a representation of the Lie algebra $sl(2)$ by using the 2-variable Laguerre polynomials. We give another representation of $sl(2)$ by the similar method.

Keywords and phrases: two variable Laguerre polynomials, Lie algebra $sl(2)$.
